

# Otter

Draw lines like fur.  
Putting in enough to give it shape.  
If you finish in color,  
add the rest with the colored pencil.  
Softly add them to make the fur thicker.

When you have the fur lines in,  
you can make the otter look  
softer with light shading.

Adding a little white spot on the corner of  
the eyes make them sparkle

The mouth in the photo goes down  
on the ends.

If you want your otter to look happy  
turn the ends up and  
give a little cheek marks.
